NOTICE OF ALLOWANCE

Allowable Subject Matter

1. Claim 1 is allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention relates to a tool having a rotatable driving head to be adjustably secured to the tool handle with a simplified lock device. It is the examiner's opinion that the art of record considered as a whole, alone or in combination, neither anticipates nor renders obvious a latch slidably received in said cavity of said handle, and including a stem having a reduced outer diameter formed therein to form an outer peripheral recess therein and to receive said outer peripheral portion and said teeth of said shank of said driving head, said latch including a first end having a disc and an actuator provided thereon and a second end having a button provided thereon, said actuator including an outer diameter greater than that of said stem, to selectively engaged into either of said depressions of said shank of said driving head, and said actuator including an inclined side portion to allow said actuator to be easily engaged into either of said depressions of said shank of said driving head, said disc and said button including an outer diameter equals to an inner diameter of said cavity of said handles to snugly receive said disc and said button in said cavity of said handle, together in combination with the rest of the limitations in the independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
